PET-ENZYMES

Chewable Tablets **PLUS**[®]
JOINT RELIEF

A powerful systemic enzyme formula

Our Joint Formula Supports:

- Allergies
- Promotes joint flexibility
- Aids in cartilage repair
- Convenient chewable tabs
- Helps reduce joint inflammation

Pet-Enzymes Plus[®] can support healthy joints and muscles in your pets by using the most comprehensive formula ever made with the power of enzymes and super antioxidants like Turmeric (Curcumin) and herbs.

This all natural formula is the most complete product ever made in a convenient cheese and bacon flavor chewable tab.

Pet-Enzymes Plus[®] is a super charged formula. It contains Turmeric, Bromelain, MSM, Boswellia Serrata, Mojave yucca root, Systemic Enzymes and more....

Free radicals constantly damage the body on a cellular level. This kind of damage can degrade the cells to the point of causing pain, inflammation, degenerative disease and more. This formula uses high anti-oxidants to help with free radical damage.

Protein build-up in the joints and tissues can be a major cause of occasional pain and inflammation in pets. In order to address this issue we use Systemic Enzymes. They work systematically by breaking down foreign protein fragments before they can cause an inflammatory or allergic response.

The high anti-oxidant properties and systemic enzymes make this product better than Glucosamine and Chondroitin formulas.

They just do not have the power!

Our pets give us so much...

This is Paddy the **Total-Zymes**[®] dog. She is now 9 years old and has been thriving and very healthy taking digestive enzymes and probiotics.

At **NWC Naturals™ Pet Products** our goal is to help pets live longer, healthier and happier lives!"
